## TrakMats<sup>TM</sup>

**Heavy duty ground protection and temporary access solutions**

### **Amazingly tough and flexible**

12.7mm thick polyethylene mats weigh only 33kg and their built in handles make handling and movement easy. Will sustain upto 60 tonnes.

### **Temporary road**

Laid in two parallel tracks or as one 2.4m wide track, the mats are ideal for use as temporary roadways.

### **Anti-slip surface**

Unique grip surface profile ensures mud is dispelled whilst vehicles traverse and non-slip traction is maintained.

### **Semi-permanent usage**

Connection options are available for more permanent situations, steep terrain and very heavy and tracked equipment.

- Provides temporary access and ground protection
- Protects lawns and landscapes as well as tarmac and concrete
- Avoids bogged down vehicles
- Avoids damage to property, heritage and eco friendly areas
- Avoids Health and Safety issues
- Easy to handle
